# Enjoy your music wirelessly

## Amazilla iWing

Stream your music wirelessly from your iPod to a speakerdock or HiFi system.

### Product information

Listening to music on your iPod through ear plugs is nice, but with speakers it sounds much better. From now on you can stay on your couch to search for another track. Your iPod is lying next to you or you are even walking around with it. Select a new song from a playlist or download a new album together with your friends. It is finally possible with the iWing, because it stands for RELAX, MOBILITY and FUN!

Since many users have their entire music collection on their iPod, Amazilla developed this clever gadget. The iWing makes it possible to stream your music from your iPod to a speaker dock or HiFi set.

The iWing is very user friendly; it makes the music come out of your speakers within five seconds. The iWing works on all iPods, from the first generation up to the iPod Touch.

The Amazilla iWing is available in three versions:

**Amazilla iWing SR-HD**

- incl. sender, receiver & dock
- for speakerdock & HiFi

**Amazilla iWing SR**

- incl. sender & receiver
- for speakerdock

- Operating current: 60mA
- Hopping RF-Channel: 2404MHz~2479MHz
- Audio data compression rate: 30%
- Pairing time: max 5 secs

#### Receiver

- Battery indicator: Red color LED
- External power jack: 2.5mm (center pin positive)
- External power supply voltage: DC 5.0V
- Audio output: 3.5mm male plug
- Pairing: auto
- Pairing time: max 5 secs
- Auto shut off (w/o signal input): 3 minutes

#### Dock

- Operating Voltage: 3.3V
- Operating current: 10mA
- Audio output line out: 3.5mm stereo jack
- External power jack: 2.5mm (center pin positive)
- External power supply voltage: DC 5.0V
- External power current: 1A
- Voltage output for iPod charging: DC 4.75 ~ 5.25V
- Receiver re-charge output: 3.5mm 4 pin jack

**PLUG IT, STICK IT,**

# **ROCK-IT**

Revolutionize the way you listen to music

## Product information

The Rock-It portable vibration speaker system takes music from your device and generates it into vibration sequences. It sends those vibrations through the Rock-It "pod" which you can stick to any object. Simply press play on your device (iPods, MP3 players, mobile phones, laptops, etc.) and Rock-It will turn the object into a speaker.

### Turn any object into a speaker

- Works with any audio device that has a headphone jack
- No speakers? No problem!
- Amaze your friends and family
- Perfect for: Traveling, around the house, parties, and anywhere else you want to Rock-it
- Revolutionize the way you listen to music
- Works best with: cardboard boxes, doors, windows, mirrors, lamp shades, flat surfaces, file cabinets, dressers, home appliances, and much much more!
